VERTICAL MIRROR MOUNT UP [DT-VMM-UP] - ON WALL PROJECTOR MIRROR MOUNT FOR LENS POINTING UP AND PROJECTOR BASE FACING AWAY FROM THE SCREEN

DT Mounts Vertical Mirror Mount Up is an on wall projector mirror mount featuring high performance optical mirrors, custom projector interface and flexible alignment adjustment. It is intended for applications with the projector lens pointing up and the base of the projector pointing away from the screen.

The Vertical Mirror Mount Up

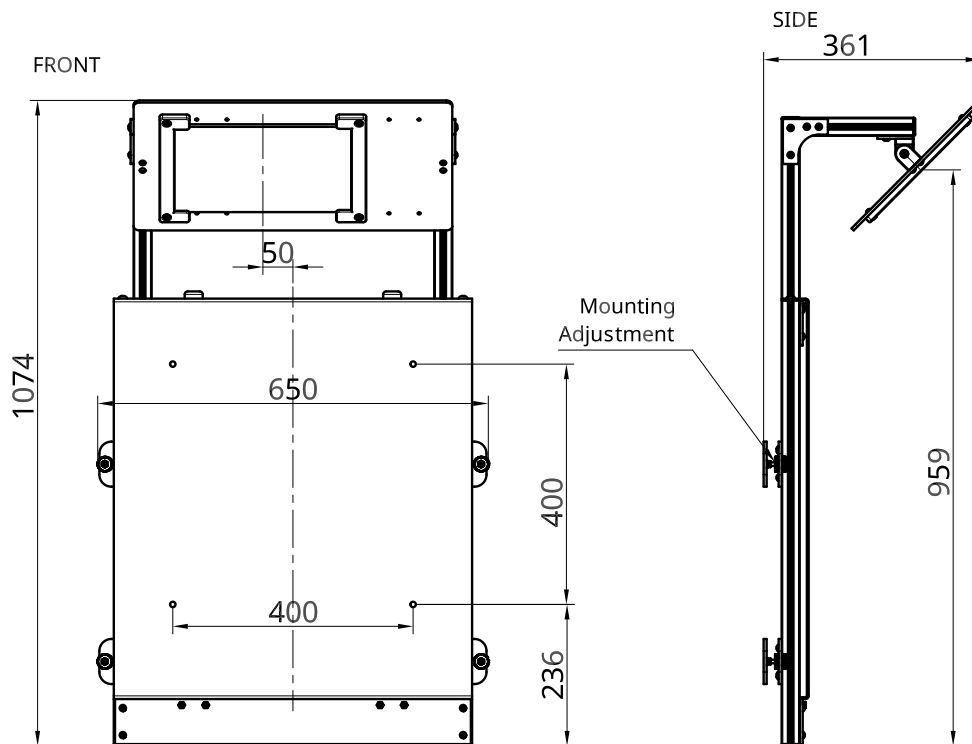

features high performance optical mirrors which have a reflectivity of over 97% and perfect flat optical mirrors which preserve optical performance without impacting colour or contrast.

The custom projector interface is

a result of the in house fabrication capabilities of DT Mounts and enables the projector to be fixed directly to the VMM-UP quickly, easily and accurately straight out of the box.

The flexible alignment adjustment

makes it straightforward to align the VMM-UP with the projector screen. Four corner adjustment allows correction for pitch and rotation and slide mounts enable accurate centre line alignment.

Example Drawing shows VMM-UP for Barco Medea. All Mounts are custom made for the projector

DT Mounts is a division of Display Technologies,

a British company specialising in advanced projector screens, mounting brackets and custom installation solutions.

Our focus on the combination of technical performance and design for install, ensure that all DT Mounts meet the needs of both the client and the installer.
