MASK-1 [DT-MASK-1] - ON WALL PROJECTOR SCREEN WITH 1 WAY MOTORISED TOP MASKING

The DT Screens Mask-1 is an on wall projector screen featuring 1 way motorised top masking, basic motor control system and Whispertec motor technology.

The Mask-1 supports 1 way motorised top masking supporting a choice of two aspect ratios, for example 1.78 and 2.37. This constant width and variable height masking perfectly frames most TV and movie content.

The basic motor control system enables easy interface to a control system and movement of the mask between two defined positions.

The proprietary Whispertec motor system runs at just 30dB which makes the Mask-1 the quietest masking screen in operation.

Example of Mask-1

DT Screens is a division of Display Technologies, a British company specialising in advanced projector screens, mounting brackets and custom installation solutions. Our focus on the combination of technical performance and design for install, ensure that all DT Screens meet the needs of both the client and the installer.
